RootShield®
RootShield®, Biological Fungicide is used in all production at AG 3, Inc. The benefits include
*Forms a protective barrier on the root system to defend against root rotting fungi,
*Colonizes outer root surface and its surrounding soil particles,
*Feeds on products released by the roots, removing the pathogen’s food supply,
*Is a living organism, which will continue to grow with the expanding root system providing
extended protection against root rotting fungi. *No adverse effects to humans, animals or plants, and *Listed by the
David Crump
David Crump, owner and operator of Carolina Gardens has been breeding Sarracenia, Drosera, Dionaea and other carnivorous plants for over 25 years. David has released ‘Carolina Yellow Jacket’, ‘Fat Chance’ and ‘Bug Bat’ to the industry through AG 3. His wish is to see these and other carnivorous varieties thrive and be strong in the industry for years to come.

Leeann Connelly
Leeann Connelly Shearouse opened Tropical Pond & Garden 25 years ago. The Florida based nursery soon began shipping aquatic and unusual plants hybridized by Leeann all over the world. In 1996, she became the contributing editor for Pond and Garden magazine. In 1998, she was awarded the Banksian Medal from the Royal Horticultural Society in London, England. In 2002, Leeann opened the Loxahatchee wildlife rescue center and hospital. The purpose of the center is to rehabilitate and return to the wild injured and orphaned wildlife. The royalties that Leeann received from her hybrids sold in this catalog go to support this center.

Marco van Noort
Marco van Noort is one of a third generation of growers that operates a nursery with his wife, Heidy. Most of the plants they propagate are rooted cuttings and are sold to perennial nurseries all over Europe. Since visiting breeder ‘Ernst Pagels’ in north Germany, Marco was infected by the breeder virus. He was taught the little details on how to produce the best, the most beautiful, the strongest and the most healthy plants. He still uses the same techniques ‘Ernst Pagels’ used in breeding his plants - “Simple” Bees. Marco has been working with ‘Simple’ bees since he was 14, it is a break in his day and his hobby to work with them. Marco believes that breeding with bees is the traditional way of breeding and although not the fastest it is the best method to create the next ‘great’ plant beauty. Marco works with Nico Rijnbeek of Rijnbeek & Zoon, BV in the Netherlands to get his product into the US market through a collaboration with AG3, Inc.

Brian Williams
For years Brian Williams would dig his collection of elephant ears every fall and replant in spring. The severe winters and frozen soil of his Louisville, Kentucky garden meant certain death to a tropical tuber, so he was surprised to find a few that would survive and sprout in spring. He began breeding with those, selecting for more vivid colors and a variety of sizes, all of which can survive a zone 6 winter. Then he selected well-behaved plants that did not produce runners. Now he shares his garden hardy selections (Alocasia, Colocasia and Canna) through tissue culture liners.

LariAnn Garner
LariAnn Garner has had an enduring interest in tropical plants since her teenage years. Two of the first plants she grew were aroids, so it is no surprise that, when her interest and focus turned to plant breeding, LariAnn chose aroids as the plant family to work with. She has been hybridizing using species in the genera Philodendron and Alocasia since the late 1970s, and since then has expanded her work to include the genera Anthurium, Caladium and Typhonium. Her skills are augmented by her degrees of Bachelor of Science in Botany and Master of Agriculture in Plant Physiology from the University of Florida. LariAnn’s primary goal has been to develop tropical hybrids that are cold resistant enough for gardens in zones 10 through 8. Even more importantly, her objective is to produce aroid hybrids that are as exotic as the rarest and most difficult to grow species, yet that can be grown by any gardener with basic skills.
Bobby & Richard Saul,  
ItSaul Plants  
The Saul brothers first launched Saul Nurseries, Inc. over 20 years ago in Atlanta, Georgia to supply the local landscape market. Robert (Bobby) Saul earned degrees in horticulture and agronomy from the University of Georgia and ran a landscaping business before entering the nursery business. Richard Saul has a degree in business from North Georgia College. His constant interest in plant breeding and his keen eye for unusual sports on plants have lead to the introduction of several new varieties through ItSaul Plants.

AGAPANTHUS
africanus
Compact, tight habit for this low-maintenance bulb. Flowers up to 2.5 feet.

**Bulbs**

**Price** .90  **Zone** 8-10  **Light** Partial - Full Sun

AGAPANTHUS
'Blue Heaven' PP#14989
Rebloomer it is! This agapanthus beauty has medium to dark blue blooms with green foliage. Rising 18 - 48 inches, you will see blooms in mid summer and early fall.

**Bulbs**

**Price** 1.50  **Zone** 7-11  **Light** Full Sun  **Royalty** +.20

AGAPANTHUS
'Blue Yonder'
Dense, showy clusters of intense cobalt-blue star flowers sit on long, sturdy stems over narrow green strap leaves. Blooms are self-cleaning, starting after the last spring frost, on this cold hardy introduction from Beyond Green LLC.

**Bulbs**

**Price** 1.50  **Zone** 5-10  **Light** Full to Partial Sun

AGAPANTHUS
'Summer Skies'
Large clusters of sky blue, star-shaped flowers with darker blue veins. Self-cleaning, the clusters top sturdy 3' stems, over the narrow green strap leaves, on this cold hardy introduction from Beyond Green LLC.

**Bulbs**

**Price** 1.50  **Zone** 5-10  **Light** Full to Partial Sun

AGAVE
geminiflora
Beautiful pin cushion type that grows in a dense, compact rosette of narrow rounded leaves.

**Landscape**

**Price** 1.00  **Zone** 9-11  **Light** Full Sun

AGAVE
gracillima x Manfreda
Green sword shape, green leaves host spots of purple to brown on this low lying perennial agave. Growing to one foot high, in mid to late spring 6 foot flower spikes can be admired.

**Tropical**

**Price** 2.00  **Zone** 7-9  **Light** Full to Partial Sun

AGAVE
nizandensis
Twelve to eighteen inches tall, this green agave looks more like a bromeliad, with green leaves that host a yellow stripe down the center.

**Tropical**

**Price** 1.50  **Zone** 5-11  **Light** Lt. Shade - Full Sun

AGAVE
parryi
Gray, glauca leaves are beautiful reaching one foot long and six inches wide. Parryi hosts a rosette pattern. Great for a container.

**Tropical**

**Price** 1.50  **Zone** 5-11  **Light** Full Sun

AGAVE
'Mystic Mirage' PPAF 10395
Narrow leaves create a teal blue, round rosette at the base of green stems. In the spring, elongated spikes produce sky blue flowers. Great for a container.

**Tropical**

**Price** 2.50  **Zone** 5-11  **Light** Full Sun

AGAVE
'Exotic Bird' PPAF 10396
Cottony pink blooms update traditional agave to an all time favorite. Better than ever before.

**Tropical**

**Price** 2.50  **Zone** 5-11  **Light** Full Sun

AGAVE
'Stevie’s Wonder'
This beautiful agapanthus grows two and a half to three feet tall with four inch spikes of violet-blue flowers. A star in most agapanthus trials, this is a must have for the garden or as a container plant.

**Bulbs**

**Price** 1.50  **Zone** 7-10  **Light** Full to Partial Shade

AGAPE
'Summer Skies'
Large clusters of sky blue, star-shaped flowers with darker blue veins. Self-cleaning, the clusters top sturdy 3' stems, over the narrow green strap leaves, on this cold hardy introduction from Beyond Green LLC.

**Bulbs**

**Price** 1.50  **Zone** 5-10  **Light** Full to Partial Sun

AGAVE
geminiflora
Beautiful pin cushion type that grows in a dense, compact rosette of narrow rounded leaves.

**Landscape**

**Price** 1.00  **Zone** 9-11  **Light** Full Sun

AGAVE
gracillima x Manfreda
Green sword shape, green leaves host spots of purple to brown on this low lying perennial agave. Growing to one foot high, in mid to late spring 6 foot flower spikes can be admired.

**Tropical**

**Price** 2.00  **Zone** 7-9  **Light** Full to Partial Sun

AGAVE
nizandensis
Twelve to eighteen inches tall, this green agave looks more like a bromeliad, with green leaves that host a yellow stripe down the center.

**Tropical**

**Price** 1.50  **Zone** 5-11  **Light** Lt. Shade - Full Sun

AGAVE
parryi
Gray, glauca leaves are beautiful reaching one foot long and six inches wide. Parryi hosts a rosette pattern. Great for a container.

**Tropical**

**Price** 1.50  **Zone** 5-11  **Light** Full Sun
AGAVE
victoria-reginae
‘Porcupine’
Very symmetrical, slow growing deep green agave with unique white markings on the leaves.

**Tropical**

ALTERNANTHERA
‘Red Thread’
Very thin red foliage is a nice contrast to other plants; adapts well to trimming for topiaries.

Landscape
Price .50 Zone 10 Light Full Sun

ALTERNANTHERA
‘Snowball’
Low mounding variety with brilliant white leaves on top of older green leaves. Very showy.

Landscape
Price .50 Zone 10 Light Full Sun

ALTERNANTHERA
‘Snow Queen’
Low growing variegated foliage; a star performer in topiary or landscape situations.

Landscape
Price .50 Zone 10 Light Full Sun

ALTERNANTHERA
‘Krinkle Red’
Diamond pattern foliage in a multitude of colors in cool weather, trims well for topiaries.

Landscape
Price .50 Zone 10 Light Full Sun

ALTERNANTHERA
‘Mai Tai’ PP#20263
A new colorful Alternanthera for the shade annual garden. The hot pink, burgundy, chartreuse, and green coloration of ‘Mai Tai’ makes for a fantastic display.

Landscape
Price .55 Zone 11 Light Partial Sun

ALTERNANTHERA
‘Party Time’ PP#14789
Green foliage splashed with pink and magenta highlights make this variety a show stopper. Grows best in shade.

Landscape
Price .55 Zone 8-11 Light Partial Sun

ALTERNANTHERA
‘Grenadine’ PP#16442
This ‘stand out’ has hot pink foliage with burgundy veins. It’s a good companion for Begonias and Caladiums in shady annual beds or containers.

Landscape
Price .55 Zone 11 Light Partial Sun

ALOE
X humilis ‘Andhogp’ Spineless Hedgehog™
An attractive Aloe with succulent, spiny leaves. ‘Hedgehog’ is an upright, stemless variety with spikes of coral-red flowers in the summer. The perfect plant for hot, dry locations.

Tropical
Price 1.10 Zone 9-11 Light Full Sun

ALTERNANTHERA
‘Krinkle Red’
Diamond pattern foliage in a multitude of colors in cool weather, trims well for topiaries.

Landscape
Price .55 Zone 11 Light Partial Sun

ALTERNANTHERA
‘Mai Tai’ PP#20263
A new colorful Alternanthera for the shade annual garden. The hot pink, burgundy, chartreuse, and green coloration of ‘Mai Tai’ makes for a fantastic display.

Landscape
Price .55 Zone 11 Light Partial Sun
ASARUM
maximum
‘Ling Ling’
This deer resistant Ginger has heart shaped, bright green foliage with silver blotches. Black flowers with a white band around the center adorn the foliage in late spring.

Perennial
Price 1.10 Zone 6-9 Light Partial to Full Shade Royalty +.20

ARUNDO
donax ‘Peppermint Stick’
Leaves are green with a white margin and are three inches wide and more than 12 inches long. This giant reed is upright to 10 feet and will tolerate drought and prolonged moisture.

Grass
Price 1.25 Zone 6-10 Light Partial - Full Sun

BAPTISIA
‘Purple Smoke’
Dozens of giant, dark purple, pea-like flowers sitting on tall erect dark stems. Extremely vigorous, the purple flowers are offset by attractive, finely textured charcoal green foliage. Flowers and pods are perfect for floral arrangements.

Perennial
Price 1.25 Zone 4-8 Light Partial Sun

BEGONIA
‘Black Fancy’
Beautifully scalloped leaves that begin with green spots and mature to black. Hosts small insignificant pink flowers.

Tropical
Price .75 Zone 10 Light Shade

BEGONIA
‘Joe Hayden’
Excellent container plant with dark star-shaped leaves and pale pink flowers.

Tropical
Price .75 Zone 10 Light Shade

ANDROPOGON
gerardii Arrowhead® ‘Nondhwr’
This fabulous selection has a tight, upright, architectural habit. It starts green-blue and its leaves, stems and flowers turn rich shades of purple-blue as the season progresses.

Perennial
Price 1.00 Zone 4-8 Light Lt. Shade - Full Sun Royalty +.27

ARUNDO
donax ‘Golden Chain’
This beauty grows to 7 feet with green leaves that have a gold margin.

Grass
Price 1.25 Zone 7-9 Light Partial - Full Sun

BAPTISIA
‘Carolina Moonlight’
A vigorous, easy to grow specimen of blue green foliage. In late spring long, soft yellow spikes will appear above the foliage. Happiest in deep, rich soil, this beauty is drought tolerant and heat-loving.

Perennial
Price 1.10 Zone 6-9 Light Partial to Full Shade Royalty +.20

BAPTISIA
‘Purple Smoke’
Dozens of giant, dark purple, pea-like flowers sitting on tall erect dark stems. Extremely vigorous, the purple flowers are offset by attractive, finely textured charcoal green foliage. Flowers and pods are perfect for floral arrangements.

Perennial
Price 1.25 Zone 4-8 Light Partial Sun

Accounts are done strictly on a prepayment or C.O.D. basis, unless prior approval has been obtained. Credit can be arranged by submitting a credit application for investigation. Any application not completed and signed will not be considered for approval. Please allow a minimum of 30 days for credit approval. For customers with approved credit, invoices are due on a 30-day net basis. We reserve the right to terminate such terms pending nonpayment of the account. This includes the right to cancel open orders on any past due accounts. Past due accounts will be subject to service charges assessed at the rate of 1.5% per month on any balance over 30 days. Customers agree to pay any and all collection expenses. This includes attorney fees and court costs should they be necessary to effect the collection of your account. A fee of $20.00 will be charged for all returned checks. For your convenience we accept MasterCard and Visa.

All plant material is inspected prior to shipment and is in good condition when accepted by the respective transportation company. All plant material should be inspected upon arrival. Any problems with the quality, quantity, or condition of the plant material must be reported. Claims must be made within 48 hours by fax, telephone, or email after receipt of goods. A digital image of product is required on all claims. If your shipment is damaged during transit, then you need to take pictures and report it as soon as possible to the carrier. AG3 will not be responsible for damage to plant material incurred during transit, including damaged boxes, smashed plantlets or plantlets out of cells due to rough transit.

List prices are in U.S. Dollars, F.O.B. Eustis, Florida and for the wholesale trade only. Prices are effective July 1st, 2014, and are subject to change without notice. Prices stated do not include shipping and handling charges. Boxing charge is $3.50 per box, $5.50 for winter pack. There is a minimum order of 2 cell pack trays. Partial trays and bare-root fees are $18.00 per tray. Partial trays are limited to two varieties. There is an international handling fee of $25.00 per order. Phytosanitary inspection fees are $55.00 per order and are subject to change without notice. Phytosanitary inspection fees and other inspection fees required by US states are the responsibility of the customer and subject to change without notice.

Shipping expenses incurred by LTL carrier, U.P.S., Federal Express, Air Freight, or by any other means is the sole responsibility of the customer. If an order is required to ship by means of airfreight, we must be given the name of the airline and the airport code. In the event that misinformation is given to the wrong destination airport, additional freight charges may be incurred and added to the invoice. The customer must provide the desired means of freight transportation.

All International shipments are the responsibility of the customer. We will not accept any claims for international shipments.

Contract propagation is available. Please contact us for further information on this service. Patented or trademarked items may be subject to royalty payments or restricted to licensed growers depending upon agreements with patent or trademark owners.

Please visit our Website at www.ag3inc.com. We have a complete listing of all plants produced, including color pictures, cultural guidelines, and prices. The site also features new plant introductions and current availabilities.

At AG3 we strive to produce quality material that is true-to-type. In the event that any stock should be proven to be untrue to its name as labeled, our liability is limited to replacing the material free-of-charge or refunding the purchase price. We will not be liable for more than the actual purchase price of the plant material.
